MAKE MORE MONEY

AND STOP WORKING FOR A LIVING

A SUMMARY OF THE BEST-SELLING BOOK:

BY RENNIE GABRIEL, CLU, CFP®

Wealth on Any Income: 12 Secrets to Financial Freedom

(Link to my book on Amazon)

FIRST: After 40 successful years in financial services, I now work to donate 100% of the profits from my wealth programs, books and business coaching to a charity where dogs are rescued, trained and donated as service animals for soldiers with PTSD and TBI (Post Traumatic Stress Disorder and Traumatic Brain Injury). Please check out the work they do at www.ShelterToSoldier.org You can both save lives and create financial freedom following the Wealth On Any Income (WOAI) system.

If you are a coach, author, speaker, employee, business owner or entrepreneur you can create tremendous value if you take action on the following information and use the forms provided.

If you are earning at least \$60,000 per year as I was, you can create financial freedom; you will be able to choose to work if you want, or choose not to work. You will see how to both live within your earnings and what actions to take to create a large passive income. Granted, I've gone broke twice after two divorces. At one time I had to collect soda bottles and cans to raise the money to buy food for my family. But my income now is 10 times what it was when started, and 90% of it is passive. I don't have to work for a living and my wife and I pay more in income taxes now than what I used to earn while working.

If you look closely, you'll see that most people handle money in a way that obligates them to make payments to finance companies, department stores, or other creditors for the rest of their lives, and they think there's no way off the treadmill. Or worse yet, they think this is the way to live the good life. They're trapped in their job or career because of the monthly payments that have to be made month in and month out, year in and year out.

Retirement is unrealistic. And when I talk about financial independence, it's not only a dream, it's a cruel joke. You need to stop listening to other people who have bought into a system that is designed to have you work the rest of your life for credit issuers and banks. It doesn't have to be that way, and these secrets (or steps) in my system will show you how to end the cycle of debt and create financial independence.

I used to think that earning more money would lead to wealth. I was wrong. Many people believe that if they become debt free that will lead to financial freedom. That is also wrong. Financial freedom comes from assets that generate your income instead of you working a job, career or business to create an income.

While there are 12 Secrets (or steps) they can be summarized as follows:

- I. Attitude: We need to think and act like a wealthy person, not like the masses.
- 2. Forms: We need to look at familiar forms the perspective of the wealthy. They know how to create and keep wealth. These forms have worked for thousands of years.
- 3. Investments: We need to invest like the wealthy do, which is not limited to stocks, bonds and mutual funds.

Secret 1: Identify Your Beliefs and Values.

Things like "If I just made more money I wouldn't need a spending plan or budget" will only keep you trapped. The richest people in the world know where their money is coming from and where it is being spent. More money never solved a problem of mismanagement any more than providing more liquor cured an alcoholic. If you value having a good time now more than planning your future and investing, you will never achieve wealth. If you value integrity, give your word to someone who will hold you accountable to what you said about an action you will take. Let someone else know what new behavior you want to establish, like systematically saving 10% of your income.

Secret 2: Plan Your Future.

This is the longest and most important step: Begin the process of creating financial freedom, or getting out of debt, by determining where you want to be five years in the future. It MUST be written down. Your goal must be SMART: Specific and Measurable, Action oriented, Realistic, and have a Time deadline You MUST involve other people to support you in reaching your goal and track your results. Nothing meaningful you can produce in life is a do-it-yourself project, and neither is this. Wealth creation is a **team** sport, not a solo sport. You must identify your values and what's important to you; not what you've been told that you are capable of by a parent, teacher, sibling, or neighbor. If you are any kind of business owner or entrepreneur, when you write down your plans and take action on your goals it will end the revenue roller coaster. Let someone else hold you accountable to completing your marketing on a daily basis. Reciprocate by supporting them on what they want to accomplish.

Secret 3: Recognize good debt from bad debt.

Good debt allows you to create financial freedom. Bad debt, like consumer spending on credit cards, will make you a wage slave to credit card companies for the rest of your life. Good debt looks like a mortgage on a rental property that the tenant pays for you. Good debt looks like a loan on a piece of equipment that makes more **profit** than the loan payments and all the related expenses. I have millions of dollars of **good** debt now, and the money to make the loan payments doesn't come from me.

Secret 4: Acknowledge the six roadblocks to financial freedom.

Debt, Economic Conditions, Taxes, Asset and Risk Management, Human Problems, and Procrastination. Having appropriate insurance will handle many of the risks, and just taking action with someone else will overcome the biggest roadblock of procrastination.

Secret 5: How to get out of debt without pain.

Use the spending plan tools that allow you to live on less than you earn, pay off consumer debt, and set aside money to create wealth. Use **Tool #I**, the **Debt** Elimination Form to pay off the lowest balance first, regardless of the level of interest. This is a psychological booster. This creates the motivation to continue, because you see results right away. BUT, do NOT focus on paying off debt and defer saving and investing.

Secret 6: Find out where you are today.

Use **Tool #2**, the **Balance Sheet** to see what you own and what you owe. Until you know where you are first, you cannot get to anywhere you want to go. If you're on your way somewhere and you get lost, isn't the first question, "Where are you?" Create a Balance Sheet of your future as your **destination**. Separate your personal use assets (like your home or auto) from investable assets (like stocks and rental real estate).

Secret 7: Getting to where you want to go.

Use Tool #3, the Cash Flow Form to build a spending plan instead of a budget. This is the map that tells you how you how you got to where you are on your Balance Sheet, and is the road map to get to where you want to go. Spend money in alignment with your goals and values. Use Tool #4, the Cash Flow Memory Jogger form to recall the areas where you spent money, but forgot. This is about spending money to achieve your goals, not doing a budget. It's not just semantics; the right words create power.

Secret 8: Track your progress.

Use **Tool #5**, the **Spending Plan Register** to track your progress, measure your pleasure from the money you spend, create consciousness, and stay within your spending guidelines. If you're not getting pleasure from how you're spending your money, change it! This will give you the information to make those decisions. The Spending Register is like the **automobile** you use on the **road map** to your **destination** of financial freedom.

Secret 9: What do you do when expenses exceed income?

You can look at fixed, variable and discretionary items and all of them can be changed with some creativity.

Secret 10: Create financial freedom by paying yourself first.

This is a concept that the wealthy have used for 5000 years, and will still be working when you and I are dead. This is how you create the fund to invest like banks and the wealthy and achieve financial freedom.

Secret II: How do you handle emergency spending without creating a financial disaster?

Another part of paying yourself first is to set up an emergency and/or opportunity account. Spend only 80% of the income you earn. Then set up two accounts, one for financial freedom (pay yourself first) and the other account to **spend later** for emergencies or opportunities and put 10% of your income into each.

Secret 12: Create a prosperous financial future.

Use the magic of compound earnings to create wealth. You can become a millionaire on \$10 per day earning 12% per year. That is only \$3600 per year. Various financial instruments have been available for decades that can earn 12%.

(Example: https://www.americanfunds.com/individual/investments/fund/aivsx)

You can start a mutual fund with as little as \$250. Learn about the difference between investing in stocks, bonds, real estate, insurance and mutual funds. Buy growth assets instead of loaning money to banks. You can buy rental real estate by using other people's money if you do not have enough of your own. Educate yourself on how to produce value for others. Use a financial planner to support you or educate you. Read financial publications or the business section of the newspaper. Get various points of views. Have insurance to protect the things you cannot replace or the risks you cannot cover. Learn to recognize investment scams and frauds. Understand getting out of debt is NOT the same as creating wealth; just like dieting does not build muscles.

* * *

You can purchase a complete copy of <u>Wealth on Any Income: 12 Secrets to Financial Freedom</u> from Amazon in paperback. Prices range from \$38 to \$214. You can also get a 2015 completely updated and revised directly from me for \$25, and 100% of the profits are donated to the charity www.ShelterToSoldier.org.

For more in depth information go to www.WealthOnAnyIncome.com You will find support from recorded interviews and modules to group coaching programs.

The following pages contain the forms previously discussed:

Tool #1, Debt Elimination Form

Tool #2, Balance Sheet

Tool #3, Income and Expense – Cash Flow Form

Tool #4, Cash Flow Memory Jogger

Tool #5, Spending Plan Register

If you would like a form to **Split Expenses for a Couple**, or the worksheet **Business Income and Expense** just send an email to **Rennie@WealthOnAnyIncome.com**

Tool #I – **Debt Elimination Form** – This is not used by the wealthy because they do not carry a credit card balance from one month to the next. They pay off each statement in full.

Example: Add \$100 extra per month to pay of consumer debts, list the LOWEST balance at the top regardless of the interest rate. Move down the list from the lowest to the highest balance.

Creditor	Balance Owed	APR%	Minimum Pmt	Payment Made
Sears	\$461	19.2	\$20.00	
MasterCard	\$1800	19.8	\$80.00	
Visa	\$1800	19.8	\$80.00	

In this example, when Sears is paid off in 4 months (by adding an extra \$100 per month) add \$120 to the minimum payment amount of the next creditor. Here you would send \$200 to MasterCard (\$80 + \$120). In about eight more months this debt will be paid off, instead of an additional 16 months. Now send \$280 per month to Visa. The total balances will be paid off in 17 months (instead of 29 months at the minimum payment) saving about \$440 of interest. This also assumes you do not add to the balances, and you did not transfer to lower rate cards.

Creditor	Balance Owed	APR%	Minimum Pmt	Payment Made

Tool #4 - CASH FLOW MEMORY JOGGER

When you sit down and fill in the Cash Flow Form and can't remember all the places you could be spending your money, this will remind you. As an example someone might say, "I don't buy clothes. I don't have any expense there." But they do if they go to the dry cleaners or laundry. Those are clothing expenses. There should be no "miscellaneous" items. If it's not on the list, and it's legal, call me and let me know what it is.

Tool # 5, the Spending Plan/Cash Register:

Cate gory		Meals out		categ ory		Groceries	
		plan to spend \$				plan to spend \$	300
		last mo. balance \$	none			last mo. balance \$	<25>
		new amt. to spend	add			new amt. to spend	275
cash credit check	Date	Notes	Amount	cash credit check	Date	Notes	Amount
cash	1/1	lunch with Bill	\$10.00	cash	1/3	Von's	25.00
						subtotal	250.00
visa	1/2	Smith business lunch	22.00	124	1/5	Safeway	31.00
		subtotal	32.00				219.00
am ex	1/3	Dinner w/ wife	26.00				
			58.00				
123	1/4	Dinner	22.00				
		w/ wife	80.00				
		Measure your pleasure:	(+)(ok)	or (-)			

This concept is the same as a checkbook register, only you establish a spending limit for the categories you will track, based on past spending or future goals. Use it to either find out how much you spend (left column), or how much you have left to spend (right column). With each purchase, or at the end of a month, determine if the amount you spent purchased the level of pleasure you paid for, or provided the level of satisfaction toward the attainment of your goals.

The circled items represent charges where the bill will show up later.
